

# Haya Water inks pact for lab services

## By A Staff Reporter

MUSCAT — In another significant milestone for Haya Water, an agreement was signed last week between the company and Husam Mohammed al Rawahi HMR Environmental Consultants for provision of laboratory analytical testing services for liquid and solid samples. The agreement cer-

emony was held at Bait Haya, and was attended by the senior management from both companies.

Hussein Abdul Hussain, CEO Haya Water, and Dr Hussam Mohammed al Rawahi, Managing Director, HMR signed the agreement for which Haya Water Central Laboratory will provide HMR Consultants with high quality testing standards and analytical serv-

ices using advanced methods that are unprecedented in Oman.

“We are excited to see such valuable partnership come into effect between Haya Water and HMR Environmental Consultants. This agreement comes in the wake of similar other agreements with several prominent local companies to provide all environmental analytical testing requirements via our state-of-the-art central laboratory,” Abdul Hussain said. “Haya Water has been a big supporter of Omani companies and always strives to offer the best of its services to the local market,” he added.

Al Rawahi valued the agreement and praised the role of Haya Water in creating opportunities of joint work with Omani companies. “HMR is thrilled to enter in this fruitful partnership with Haya Water. It is another step in our efforts to encourage cooperation between local companies to promote national economy and develop excellent platforms for progress and development,” he noted.
